McCreey Department Store, Pittsburgh. Architects: Graham, Anderson, Probst and White, Chicago. Fire Extinguisher System installed by the General Fire Extinguisher Co.

## Nineteen Years of Flawless Service in Pittsburgh

ANACONDA BRASS PIPE has given nineteen years of uninterrupted service in the McCreey Department Store at Pittsburgh, Pa. Used in the concealed work of the sprinkler system, it has done away with maintenance charges and is in place today—a typical record of Anaconda corrosion resistance.

The architect who specifies Anaconda Brass Pipe protects his client against plumbing maintenance charges—an important consideration in planning present-day buildings.

"Brass Pipe for Water Service" gives valuable information on plumbing costs. Free to architects.

The Bamberger Ideal Home  
Newark, N. J.

Francis Nelson, Architect  
C. F. Karser, Plumbing Contractor

## When Bamberger Builds

One of America's great department stores—L. Bamberger & Company, Newark, N. J.—has just finished an "Ideal Home" for exhibition purposes. Infinite care and skill have guided decisions on every detail of construction and furnishing.

Brass Pipe was chosen for hot and cold water lines because it cannot rust. And because true economy is reckoned by length of service rather than initial cost.

Anaconda Guaranteed Brass Pipe was chosen, above all others, because its quality has been proved by records of long service. It is guaranteed by the largest manufacturer in the Copper and Brass industry and is trademarked for the purpose of permanent identification.

Counter screen of Bowery Savings Bank, New York City, York & Sawyer, Architects. Fabricated by William H. Jackson Company.

Section of counter screen, Bowery Savings Bank, New York City.

## Anaconda Architectural Bronze Extruded or Drawn Shapes and Mouldings

The Bronze Counter Screen of the Bowery Savings Bank fittingly illustrates the ornamental effects possible when Anaconda Extruded Bronze Shapes are combined with Bronze Castings. Anaconda Extruded Shapes are accurate to dimensions and conform in every detail to the Architects' drawings. The lines are clean and sharp, and the surface of the metal so smooth that it requires little if any machining.

Anaconda Bronze Shapes are advantageously used for windows, grills, doors, mouldings, directory frames, thresholds, etc.

The Extrusion Department of The American Brass Company at Ansonia, Conn., and Kenosha, Wis., will be pleased to co-operate with Architects who contemplate the use of ornamental bronze.

Entered as Second-Class Matter, March 30, 1900, at the Post-Office at New York, N. Y., under the Act of March 2, 1879.

\*Reg. U. S. Pat. Office.

Counter screen of Bowery Savings Bank, New York City, York & Sawyer, Architects. Fabricated by William H. Jackson Company.

Section of counter screen, Bowery Savings Bank, New York City.

## Anaconda Architectural Bronze Extruded or Drawn Shapes and Mouldings

The Bronze Counter Screen of the Bowery Savings Bank fittingly illustrates the ornamental effects possible when Anaconda Extruded Bronze Shapes are combined with Bronze Castings. Anaconda Extruded Shapes are accurate to dimensions and conform in every detail to the Architects' drawings. The lines are clean and sharp, and the surface of the metal so smooth that it requires little if any machining.

Anaconda Bronze Shapes are advantageously used for windows, grills, doors, mouldings, directory frames, thresholds, etc.

The Extrusion Department of The American Brass Company at Ansonia, Conn., and Kenosha, Wis., will be pleased to co-operate with Architects who contemplate the use of ornamental bronze.

## THE AMERICAN BRASS COMPANY
